

WHY GEOGRAPHY?

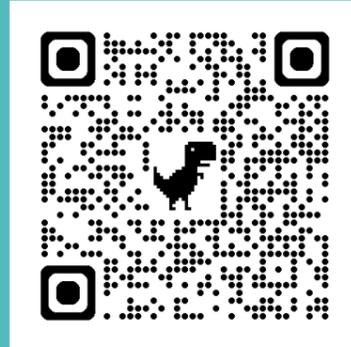

Geography is more than countries and capitals

It is the study of the complex, unfolding relationships between people and the land they live on. With background knowledge grounded in the sciences, ethics, history, and the humanities, geographers go beyond mere cataloging and seek to understand the places and spaces we inhabit—in order to make them more just and equitable.

Discover a world of possibilities with a degree in geography
[~2 min video]

Learn more about geography careers from the profiles of geographers working in education, business, nonprofit organizations, and government agencies. Read about why they chose to pursue their career path and how exciting, meaningful, and successful a career in geography can be!

Student Resources
Students should have consistent access to equitable and inclusive resources to create a fair and supportive learning environment for themselves.
